PROFESSIONAL SUMMARY

Software Development Engineer with **3+ years** of hands-on experience spanning **.NET microservices development**, **AI chatbot development**, and **Angular**-based frontend engineering. Proven track record of architecting full-stack solutions including enterprise-scale RAG chatbots and high-performance backend microservices, from data modeling to production UI delivery — with a focus on performance, security, and maintainable architecture.

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET / ASP.NET Core, TypeScript, JavaScript, Angular

AI & Search: OpenAI Assistants & Responses APIs, LLMs, Prompt Engineering, RAG, Semantic Search, Elasticsearch

Databases & Caching: MySQL, PostgreSQL, MongoDB, Cosmos DB, Redis

Architecture & Patterns: RESTful APIs, Microservices, Micro-Frontends (MFE), Service-to-Service Communication (Refit & Azure Service Bus), Event-Driven Systems

PROFESSIONAL EXPERIENCE

Software Development Engineer II

Exxat Systems Pvt. Ltd., Vadodara, Gujarat

Jan 2026 – Present

- Spearheaded the backend foundation of a new **Assessment microservice**, designing scalable relational schemas in **PostgreSQL** and implementing the **Unit of Work** design pattern to ensure transactional data integrity
- Developed an advanced **AI Auto-Grading engine** utilizing **Large Language Models** to automatically evaluate student responses against complex, multi-level rubric matrices (Criterion and Level)
- Integrated smart **AI insights** and generative features, enabling the automatic generation of assessment questions from course documents and providing real-time difficulty analysis based on student performance
- Executed rigorous **load testing** utilizing **K6**, identifying system bottlenecks and optimizing database queries, successfully reducing **p95** latency from **1s** to **200ms** and **p99** latency from **1.7s** to **350ms** under high load

Software Development Engineer I

Exxat Systems Pvt. Ltd., Vadodara, Gujarat

Jun 2023 – Jan 2026

- Architected an **AI-powered enterprise chatbot** capable of handling dynamic user intents—including natural language-to-Elasticsearch query generation (DataSearch), static/dynamic navigation, and organizational FAQs using **Semantic Search** and **Retrieval-Augmented Generation (RAG)**
- Designed a scalable **event-driven knowledge pipeline** that automatically ingests, chunks, and updates FAQ documents in the **vector database** via **Zendesk webhooks** and custom **web scrapers**, ensuring the LLM always has access to real-time company data
- Engineered an automated **LLM-as-a-judge** evaluation pipeline, integrating a robust caching strategy that processed over **3.6 billion** tokens while maintaining a **99%** cache-hit rate for generated LLM responses
- Engineered a high-performance **conversation history system** utilizing **MongoDB** for persistent storage and background asynchronous jobs to index chat metadata into **Elasticsearch** for fast retrieval and analytical insights
- Led the development of the UI for the **Conversational chatbot** and delivered it as a discrete **Microfrontend**. This MFE was subsequently integrated into multiple products of the company, reducing the L1 support ticket count by **85%**

EDUCATION

B.E. Computer Engineering

G. H. Patel College of Engineering and Technology (GCET), Gujarat

CGPA: **9.26 / 10**

2019 – 2023
